

Appl. No. 10/720,545

Amdt. Dated: June 17, 2005

Reply to Office Action of March 18, 2005

Amendments to the Specification:

Please replace the following amended paragraphs with the corresponding paragraphs in the present application:

[0008] In order to achieve these objects, in accordance with the present invention, there is provided a device for exercising the Kegel muscle of a female and enhancing sexual stimulation. The device has a first rounded end for insertion into the female's vaginal cavity and a second rounded end for insertion into the same female's anal cavity. The device also has an S-shaped curved intermediate portion connecting the first rounded end to the second rounded end and configured in a manner such that the first rounded end and the second rounded end lie in a same plane and are spaced from each other such that the second rounded end may be concurrently inserted into the anal cavity ~~once~~ after the first rounded end has been inserted concurrently into the vaginal cavity. The S-shaped curved intermediate portion has a fulcrum which bears against the front wall and the back wall of the Kegel muscle.

[0009] In a preferred embodiment of the present invention the first rounded end comprises a first sphere and the second rounded end comprises a second larger sphere. The fulcrum is positioned proximate to the second sphere and the S-shaped curved intermediate portion also has an arc positioned proximate to the first sphere.
